No water required.
Will not reduce the tip temperature like conventional sponges.
Cleans better than conventional sponges.

**CAUTION**
Cleaning the wire:
*There might be a small amount of white powder in the bag. This is a normal by-product of the flux in the wire. It will not affect the use or efficiency of this product.
*Do not use as a cleaning pad on kitchen ware.
*Keep out of reach of children.

**OPERATION**
- Do not "wipe" the tip against the cleaning wire. This action may cause dangerous splatter from solder that may be on the tip.
- When changing the cleaning wire remove the top case in a vertical direction to prevent solder debris from falling out.
