Features

Optomax Digital liquid level switches are ideal for applications with restricted space that require a miniature, low power and low cost sensing solution.

The microcontroller based sensor is solid state, incorporating an infra-red LED and phototransistor which are optically coupled by the tip when the sensor is in air. When the sensing tip is immersed in liquid, the infra-red light escapes making the output change state.

Output Values

Output Voltage ($V_{out}$): $I_{out} = 100mA$

Output High: $V_{out} = V_s - 1V$ max

Output Low: $V_{out} = 0V + 0.5V$ max

Technical Specifications

Supply voltage ($V_s$): 4.5V DC to 15.4V DC

Supply current ($I_s$): 2.5mA max. ($V_s = 15.4V_{DC}$)

Output sink and source current ($I_{out}$): 100mA

Operating temperatures: -25°C to +80°C

Storage temperatures: -30°C to +85°C

Housing material: Polysulfone

Sensor termination: 24AWG, 250mm PTFE wires, 8mm tinned

Mounting thread: M12x1x8g with hex nut

Operating pressure: 7bar / 101psi maximum

Tightening torque: 1.5Nm / 13.26 in-lb maximum

Before use check that the fluid in which you wish to use these devices is compatible with Polysulfone.

Sensor is mounted externally.

Hex nut and O-ring sold separately; email: technical@sstsensing.com for details.

When correctly sealed.

Voltages applicable to output value stated.

Other sensor options available on request, email: technical@sstsensing.com

**INFORMATION**

As customer applications are outside of SST Sensing Ltd.’s control, the information provided is given without legal responsibility.

Customers should test under their own conditions to ensure that the equipment is suitable for their intended application. Before use, check that the fluid in which you wish to use these devices is compatible with Polysulfone.

For technical assistance or advice, please email: technical@sstsensing.com

---

**CAUTION:**

- Do not exceed maximum ratings and ensure sensor(s) are operated in accordance with their requirements.
- Carefully follow all wiring instructions. Incorrect wiring can cause permanent damage to the device.
- SST Sensing Ltd recommend using alcohol based cleaning agents. Do NOT use chlorinated solvents such as trichlorethylene as these are likely to attack the sensor material.
- Failure to comply with these instructions may result in product damage.

---

**ORDER INFORMATION**

Specify the part number listed below when ordering.

```
L L C 2 0 0 D 3 S H - L L P K 1
```

**Housing Material**: C Polysulfone

**Housing Type**: 2 M12x1

**Operating Temp.**: 0 °C to +80 °C

**Output Logic**: Blank Output High in air

---

**CAUTION:**

- Take care when connecting loads. The minimum load impedance should not exceed Vs/max output current.
- NOTE: Shorting the output to Vs or 0V will result in irreparable damage to the sensor.
