SPECIFICATIONS

Product Name  DUST SENSOR

Model No.  GP2Y1014AU0F

These specifications contain 11 pages including the cover and appendix. This specification sheets and attached sheets shall be both side copy. After confirmation of the contents, please be sure to send back copy of the Specifications with approving signature on each. If you have any objections, please contact us before issuing purchasing order.

1. These specification sheets include materials protected under copyright of Sharp Corporation ("Sharp"). Please handle with great care and do not reproduce or cause anyone to reproduce them without Sharp's consent.

2. When using this Sharp product, please observe the absolute maximum ratings, other conditions and instructions for use described in the specification sheets, as well as the precautions mentioned below. Sharp assumes no responsibility for any damages resulting from use of the product which does not comply with absolute maximum ratings, other conditions and instructions for use included in the specification sheets, and the precautions mentioned below.

(Precautions)
(1) In making catalogue or instruction manual based on the specification sheets, please verify the validity of the catalogue or instruction manuals after assembling Sharp products in customer's products at the responsibility of customer.

(2) This Sharp product is designed for use in the following application areas:
- Computers • OA equipment • Telecommunication equipment (Terminal) • Measuring equipment
- Tooling machines • Audio visual equipment • Home appliances
If the use of the Sharp product in the above application areas is for equipment listed in paragraphs (3) or (4), please be sure to observe the precautions given in those respective paragraphs.

(3) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when Sharp product is used for equipment in responsibility of customer which demands high reliability and safety in function and precision, such as:
- Transportation control and safety equipment (aircraft, train, automobile etc.)
- Traffic signals • Gas leakage sensor breakers • Rescue and security equipment
- Other safety equipment

(4) Sharp product is designed for consumer goods and controlled as consumer goods in production and quality. Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as:
- Space equipment • Telecommunication equipment (for trunk lines)
- Nuclear power control equipment • Medical equipment

(5) Please contact and consult with a Sharp sales representative if there are any question regarding interpretation of the above four paragraphs.

3. Disclaimer
The warranty period for Sharp product is one (1) year after shipment. During the period, if there are any products problem, Sharp will repair (if applicable), replace or refund. Except the above, both parties will discuss to cope with the problems.

The failed Sharp product after the above one (1) year period will be coped with by Sharp, provided that both parties shall discuss and determine on sharing responsibility based on the analysis results thereof subject to the above scope of warranty.

The warranty described herein is only for Sharp product itself which are purchased by or delivered to customer. Damages arising from Sharp product malfunction or failure shall be excepted.

Sharp will not be responsible for the Sharp product due to the malfunction or failures thereof which are caused by:
(1) storage keep trouble during the inventory in the marketing channel.
(2) intentional act, negligence or wrong/poor handling.
(3) equipment which Sharp products are connected to or mounted in.
(4) disassembling, reforming or changing Sharp products.
(5) installation problem.
(6) act of God or other disaster (natural disaster, fire, flood, etc.)
(7) external factors (abnormal voltage, abnormal electromagnetic wave, fire, etc.)
(8) special environment (factory, coastal areas, hotspring area, etc.)
(9) phenomenon which cannot be foreseen based on the practical technologies at the time of shipment.
(10) the factors not included in the product specification sheet.

4. Please contact and consult with a Sharp sales representative for any questions about Sharp product.
1. Application
This tentative specification applies to the outline and characteristics of Model No. GP2Y1014AU0F (Dust sensor).

2. Outline
Refer to the attached drawing No. CY15282i02B.

3. Ratings and characteristics
Refer to the attached sheet, Page 5 to 6.

4. Reliability
Refer to the attached sheet, Page 7.

5. Outgoing inspection
Refer to the attached sheet, Page 8.

6. Supplements
6-1 Output voltage vs Dust density characteristics [Example]:
Refer to the attached sheet, Page 9.

6-2 This product shall not contain the following materials.
Also, the following materials shall not be used in the production process for this product.
Materials for ODS : CFCs, Halon, Carbon tetrachloride, 1,1,1-Trichloroethane (Methylchloroform)

6-3 This product does not contain the chemical materials regulated by RoHS directive
(except for the parts NOT regulated by RoHS directive).

6-4 Product mass : Approx. 16g

6-5 Packaging specification : Refer to the attached sheet, Page 10

6-6 Country of origin : China or Indonesia

6-7 Compliance with each regulation
6.7.1 The RoHS directive (2011/65/EU)
This product complies with the RoHS directive (2011/65/EU).
Object substances: mercury, lead, cadmium, hexavalent chromium, polybrominated biphenyls (PBB)
and polybrominated diphenyl ethers (PBDE)

6.7.2 Content of six substances specified in Management Methods for Control of Pollution Caused by Electronic
Information Products Regulation (Chinese: 电子信息产品污染控制管理办法).

<tbody>
<tr>
<td></td>
<td>Lead (Pb)</td>
</tr>
<tr>
<td>Dust sensor</td>
<td>×</td>
</tr>
</tbody>
</table>

This table is prepared in accordance with the provisions of SJ/T 11364.
○ : Indicates that said hazardous substance contained in all of the homogeneous materials for this part is
below the limit requirement of GB/T 26572
× : Indicates that said hazardous substance contained in at least one of the homogeneous materials used
for this part is above the limit requirement of GB/T 26572
7. Notes

7-1 Connection of case and GND
Case material use conductive resin as cover case (printed model No.) and metal (test terminal side) as bottom cover. The metal case connects with GND in sensor.

7-2 Cleaning
Please don’t do cleaning, because there is a case that this device is not satisfied with its characteristics by cleaning.

7-3 Pulse input range
Please subject to recommendation written in the paragraph (3-4) as regard input condition for LED in order to keep reliability.

7-4 Dust Adhesion
There is a case that this product does not detect the dust density correctly, since the dust adhered to the inside of the dust through hole may project into the detecting space which consist of emitter and detector light axis. Please take the structure and mechanism of the equipment into consideration to avoid the influence of adhered dust. And when the dust is adhered, please consider the maintenance such as vacuuming or blowing off the dust by air. In addition, please pay attention to structure and placing location of the application to avoid any adhesive particle like oil, etc. to gets into the device. If it sticks to optical part, malfunction may occur.

7-5 Light output
In circuit designing, make allowance for the degradation of the light emitting diode output that results from long continuous operation. (50% degradation/5years)

7-6 Sensitivity adjustment VR
VR for sensitivity adjustment is set up at shipping from Sharp. Please do not touch the VR or Electro-optical characteristics specified on the specification will be invalid.

7-7 Resolution
Please do not disassemble the device such as removing a tapping screw and so on. Even if the device is reassembled, it may not satisfy the specification.

7-8 Application to fire alarm
Please do not use this device for a fire alarm application. When using this device to application other than air purifying and equipment with air purifying function, please inform us before usage.

7-9 Noise influence
If the sensor is located close to noise source (ex. Electric dust collector, etc.), the sensor output may be affected by leaded noise. On top of that noise from power supply line also may affect the sensor output. When designing the system, please consider the effect from noise.

7-10 Vibration influence
The sensor may change its output value under mechanical oscillation. Before usage, please make sure that the device works normally in the application.

7-11 Incident light influence
There is a case that the sensor output may be affected when outer-light comes through dust through hole on printed side. In order to avoid any influence from outer-light, please locate the printed side of the sensor facing to inside of the application.

7-12 Dewing
When inside of the sensor is moisturized, this product does not keep its proper function. Please design the application so that moisturization of the sensor does not happen.
2. Outline

1) Unspecified tolerance shall be ±0.3mm

*1 Test conditions are according to 3-3 Electro-optical characteristics.

*2 After test, measurement shall be done after leaving under the normal temperature and the normal humidity for 2h. And there should be no dew.

*3 LED terminal input conditions for operating test apply according to electro-optical characteristics(3-3).

*4 These test results are sampling examples from a specific lot for reference purpose only, and do not constitute any warranty or assurance in connection with the products.
5. Outgoing inspection

(1) Inspection lot
Inspection shall be carried out per each delivery lot.

(2) Inspection method
A single sampling plan, normal inspection level II based on ISO 2859 shall be adopted.

<table>
<thead>
<tr>
<th>Defect</th>

<td>1.0</td>
</tr>
</tbody>
</table>

(*) Split, chip, scratch, stain
One which affects the characteristics of para. 3-3 shall be defect.

(*) Rust shall not be defect.
6-1 Test conditions are according to 3-3 Electro-optical characteristics.
6-4 Packing specification

1. Put products in a non-electrostatic charge bag (turning down a non-electrostatic charge bag) of 50pcs in tray. Packing method is showed in the above fig. (Fig.1)
2. Put them (5-tray) with product on a non-electrostatic charge bag and put in the packing box. Put pad on their top. (Fig.2)
3. Seal the packing box with kraft tape. (Folding the mouth of the bag)
4. The mouth of the bag shall put it on top of one another
   Print the model No., quantity, inspection date. (250pcs/a packing box) (Fig.3)
5. Indication items
   The contents of the carton indication conforms to EIAJ C-3 and the following items are indicated.
   Model No., Internal production control name, Quantity, Packing date,
   Corporate name, Country of origin

(Formal packed mass: Approximately 5.6kg)
