MHP30 PD

MHP30 Mini Hot Plate Preheater is an ultra-mini constant temperature hot plate with pocket size.

MHP30 has a small and exquisite appearance tower shape and a total height of only 5.2cm.

It eliminates redundancy, retains sufficient effective area, greatly saves energy and heating time;

MHP30 controller and hot plate can be flexibly replaced;The controller is equipped with an LCD and two physical buttons (on the back);

A pair of support feet at the bottom can be separated to better support the whole station;

The hot plate's heating body is made of brass ceramic coating, smooth on surface and even.

When using 65W PD power supply, it only takes 10 minutes to heat from 26°C room temperature to 300°C.

The controller has a built-in true color LED temperature display; with the rises and falls of the temperature, let you know the warm and cold at a glance;

MHP30 also has smart modes such as preset temperature protection, power wake-up and automatic sleep.

Users can set to turn on or off these functions according to their needs.
